**IENOVA ANNOUNCES THE WITHDRAWAL OF CERTAIN WRITS FOR CONSTITUTIONAL RELIEF THAT WERE FILED AGAINST THE TENDER PROCEDURES CALLED BY THE FEDERAL ELECTRICITY COMMISSION LAST YEAR**

Mexico City – Infraestructura Energética Nova, S.A.B. de CV, "IEnova" (previously Sempra Mexico) announces that the Sásabe Pipelines, S. de R.L. de C.V. and Guaymas Pipelines, S. de R. L de C.V. companies, respectively have withdrawn the writs for constitutional relief that they filed against the tender procedures called by the Federal Electricity Commission last year, the purpose of which was the building and operation of four gas pipelines in the northwest of the country, known as Proyecto Norte-Noroeste (North-Northwest Project), and particularly against the rulings about the Sásabe-Guaymas and Guaymas-El Oro segments, which were awarded to Gasoducto de Aguaprieta, S. de R.L. de C.V., an IEnova subsidiary company. Because of the above, the competent courts ruled to stay both writs of constitutional relief, and in consequence the rulings in favor of the IEnova subsidiary ceased to be controverted by these companies.

IEnova will continue developing gas pipelines that are strategic for the country, and which will have a length of 835 km and a combined capacity of 1,280 mpcd (13.3 mthd) and represent an investment of approximately USD \$1 billion.
