

**IENOVA ANNOUNCES THAT IT WON TWO RENEWABLE ENERGY PROJECTS IN THE SECOND LONG-TERM SUPPLY AUCTION ORGANIZED BY THE CENTRO NACIONAL DE CONTROL DE ENERGÍA (CENACE)**

Mexico City, September 28, 2016 – Infraestructura Energética Nova, S.A.B. de C.V. (“**IEnova**”) informs that in connection with the call issued by the Centro Nacional de Control de Energía (“**CENACE**”) to participate in the Second Long Term Bid for the supply of Power, Electric Power Stacks, and Clean Energy Certificates (*Certificados de Energía Limpias*) (CELs), it was awarded two solar projects through its subsidiaries.

The Company will develop, construct, and operate the approximately 41 MW Rumorosa Solar project, which is located near the Energía Sierra Juárez wind park in the state of Baja California and the approximately 100 MW Tepezalá II Solar project, which is located in the State of Aguascalientes. The Tepezalá II Solar project has been developed and will be constructed in collaboration with Trina Solar, a world leader in solar energy, who will have a 10% stake in this project. The estimated investment for both projects is US\$150 million.

The commercial operation date of both projects is estimated to occur during the second quarter of 2019. These projects have long-term agreements with the Comisión Federal de Electricidad (20 years for Clean Energy Certificates and 15 years for Power and Electric Power Stacks).

As a result of CENACE’s resolution, IEnova, through its subsidiaries, will be responsible for complete project implementation including obtaining permits, acquiring of land and rights of way, and performing engineering, procurement construction, financing, operation, and maintenance.

This initiative is aligned with IEnova’s strong commitment to the development of renewable energy that contributes to reaching Mexico’s goals regarding this issue.
