

## **IENOVA EXECUTES CONTRACTS FOR REFINED PRODUCT STORAGE TERMINALS IN MANZANILLO AND GUADALAJARA**

- ***TP Terminals, S. de R.L. de C.V., a joint venture between IEnova and Trafigura - controlled by IEnova- signs 740,000 barrels of storage in the Manzanillo terminal with major international integrated oil company.***
- ***IEnova also signs 290,000 barrels of storage with the same company in a new terminal in Guadalajara.***

Mexico City, April 30, 2019 – IEnova announces the execution of two long-term contracts for the receipt, storage, and delivery of refined products in terminals that IEnova is developing in Manzanillo, Colima, and Guadalajara, Jalisco.

The terminal in Manzanillo, in which IEnova holds a 51% stake in a joint venture with Trafigura, has secured 1.48 million barrels of storage, including the 740,000 barrels previously agreed with Trafigura. In Manzanillo, the development of a marine terminal to receive refined products by ship, store and deliver them by rail and truck is planned.

In the Guadalajara terminal, IEnova executed an agreement with the same company that enables the storage of up to 290,000 barrels of gasoline and diesel in a new terminal that will be able to receive refined products by rail, store and deliver them by truck. The total capacity will be defined once additional commercial agreements with prospective customers have been completed.

These two terminals will enhance supply options, improve logistics, and increase fuel delivery reliability in the central west region of Mexico, which will translate into benefits for consumers in the region.

Subject to executing certain agreements, this global integrated oil company will have the option to acquire up to 20% of the equity of the Manzanillo project and up to 25% of the equity in the Guadalajara project; in each case, IEnova will always hold at least 51% of the equity of each project.

Paseo de la Reforma No. 342, Piso 24

IEnova, through its affiliates, will be responsible for all aspects of implementing each of these two projects, including permitting, engineering, procurement, construction, financing, operations, and maintenance of the terminal. With these two projects, IEnova now has seven refined product terminal storage projects under development in the country, which is consistent with its commitment to position itself as a leader in the refined product transportation and storage segment, as well as to contribute to the development of infrastructure and energy security in Mexico.

### **About IEnova**

IEnova, a *Sempra Energy* Company, develops, constructs y operates energy infrastructure in Mexico. With more than 1,000 employees and approximately \$8.2 billion dollars invested in the country, IEnova's portfolio includes various business lines across the Mexican energy value chain. IEnova is the first energy infrastructure company to be listed on the Mexican Stock Exchange, and it is the only energy company that is included on the IPC Sustainability Index.
