

**IENOVA ANNOUNCES THE RESULTS OF THE BIDDING PROCESS FOR THE RENDERING OF NATURAL GAS TRANSPORTATION SERVICES FOR THE COMISIÓN FEDERAL DE ELECTRICIDAD IN THE SEGMENT LA LAGUNA - AGUASCALIENTES.**

Mexico City, March 16, 2016 – Infraestructura Energética Nova, S.A.B. de C.V., “**IEnova**”, informs that today, Comisión Federal de Electricidad (“**CFE**”) announced the decision of the bidding process for the rendering of natural gas transportation services in the segment La Laguna – Aguascalientes (the “Bidding Process”), in which it participated through one of its subsidiaries.

IEnova’s technical proposal was approved in the Bidding Process, in as much as CFE qualified it as “in compliance” (“*cumple*”). Today, CFE announced that IEnova’s economic proposal was rejected; arguing that it did not satisfy the requirements of the Bidding Process and therefore declared it non-conforming.

It is worth to mention that, based on the evaluation methodology used in this Bidding Process, IEnova’s Economic proposal was better than the proposal declared winner by more than US\$7’000,000.00 (Seven Million US Dollars).

During the last 20 years, IEnova has participated in Mexico’s energy sector, in several bidding processes and has never been disqualified for failure in the integration of its technical or economic proposals or for any other reason.

IEnova is not satisfied with the rejection of its proposal as it considers it solvent according to the Bidding Process’ rules; therefore it will exercise the administrative and legal actions available.
